

LOADED KNUCKLES

SUSPENSION & STEERING KNUCKLE KITS

The Latest Innovation from the Aftermarket's Knuckle Experts

With the Most Comprehensive Coverage Available

698-012

Ford Explorer, Mercury Mountaineer 2005-02

Loaded Knuckles are pre-pressed knuckle assemblies with everything included for an easy repair. Rear applications come pre-assembled with parking brake shoes and hardware **(DORMAN EXCLUSIVE!)**

- The technician-preferred, bolt-on solution that can save 90+ minutes when replacing difficult Gen-1 (press-in) bearings
- Never again worry about damaging individual components during hub removal
- Press-free solution opens up the job to all repair facilities
- Dorman will grow the Aftermarket with dozens of New to the Aftermarket SKUs

FAILURE MODE:

- Bearing failure – Bearings typically wear out between 75-150K miles
- Knuckle failure – Often damaged by collisions, potholes, and curb strikes
- Rust
